

HYPO POOL SHOCK

HIGH DOSE SHOCK CHLORINE TREATMENT

Hypo Pool Shock is a high-strength calcium hypochlorite granule formula that instantly releases large amounts of available chlorine for rapid oxidation and powerful disinfection, quickly restoring crystal-clear, hygienic pool water.

Features

High-Dose Chlorine Release

Destroys Bacteria & Algae

Restores Water Clarity

Shock Chlorination

Fast-Dissolving Granules

How To Use

1 Check and balance pH levels to 7.2–7.6.

2 Dissolve 150–200g per 10,000 litres in a bucket of water and distribute evenly around the pool at dusk.

3 Run the pump for 8–12 hours, then retest the water before allowing swimmers.

Storage & Disposal:

Store in a cool, dry, well-ventilated area away from direct sunlight and heat. Keep container tightly sealed.

Caution:

Avoid contact with eyes, skin, and clothing. Do not mix directly with other pool chemicals. Use safety gloves and goggles when handling the product.
